

Patient Information: Hearing Therapy

Within our Audiology department, we offer hearing therapy, which is a service specifically for patients who may require additional support with problems such as:

- bothersome tinnitus
- hearing loss
- problems with sensitivity to noise
- auditory training advise
- balance problems
- sudden acquired hearing losses
- auditory processing type difficulties.

How long will the appointment be?

40 to 60 minutes

What to expect during the appointment

Our hearing therapist can help you find ways of coping with your difficulties. Many of these strategies involve a counselling-based approach.

Some of the services offered may include management of tinnitus, sound therapy and listening tactics.
