

Initiating Difficult Conversations About Future Care Planning webinar

Free online taster session to celebrate National Future Care Plan Day 2025.

Participants will watch a real time interactive demonstration led by EC4H tutors and will have the opportunity throughout the session to contribute suggestions and feedback via the chat box.

Clinicians need to be able to talk about emergency treatment and care planning e.g., Treatment Escalation Plans and ReSPECT, goals of care, and planning for care around dying, including DNACPR discussions. This webinar will explore effective ways to help people think and plan ahead.

This webinar is open to all EC4H partner boards

Wednesday, 7th May (11 am to 12.30 pm)

Platform: MS Teams

Free

BOOK ONLINE: [Click here](#)

Overview

This session will focus on initiating future care planning conversations with a patient/family member when the patient has a life limiting illness, but their condition is stable.

Emphasis will be on discussing goals of care for the future sensitively and effectively with a focus on “what matters” to individuals and their families.
