

Return your used inhalers to a pharmacy to help reduce your carbon footprint

The propellants used in some inhalers are powerful greenhouse gases that contribute to climate change. Even after an inhaler is finished it still contains these environmentally damaging gases. (Please be assured these gases are not harmful to you when you use your inhaler)

Return all used inhalers to your local pharmacy for safe disposal. Returned inhalers will be incinerated which will destroy the greenhouse gases and prevent inhaler plastics going to landfill.

If you have concerns about the environmental impact of your inhaler, make an appointment with your GP practice - don't stop using your inhaler!
