

## The Meaning of the Meaningful Activities Team

Claire Palmer, Associate Nurse Director, WGH on behalf of A Bishop, J Hodge, K Hutchison, S Keir

#### **Meaningful Activities Team**

- Initially a small roving team of 2 registered nurses and 1 non-registered nurse with 10 trained volunteers.
- May 2022 trial and successful establishment of activities coordinator in ward 71 (Stroke rehabilitation).
- February 2023 trial of an activities coordinators in Medicine of the Elderly wards at the Western General Hospital. Funding supported by small ward mergers.
- July 2023 Addition of a mental health nurse to the small roving team.
- May 2024 Extension of funding for a further year for ward-based activities coordinators

## Why do we need a Meaningful Activities Team?

#### **NICE Guidelines for Dementia**

- 1.4 Interventions to promote cognition, independence and wellbeing
- 1.4.1 Offer a range of activities to promote wellbeing that are tailored to the person's preferences.
- 1.4.2 Offer group cognitive stimulation therapy to people living with mild to moderate dementia.

#### **SIGN Guidelines for Dementia**

- 2.5 Non-pharmacological approaches for distressed behaviours
  - R For managing distressed behaviour symptoms in people with dementia, tailored activities based on a comprehensive structured assessment may be considered. Activities should be individualised, focus on preserved capabilities and consider previous roles, interests and preferences.

## Dementia in hospitals improvement toolkit (Healthcare Improvement Scotland, 2023)

# Aim Primary Drivers Seconda Proactive and personstress a Person-centred approach including engagement with carers and relatives Improved outcomes for people with Meaningful activities indicates

dementia in

hospitals

Skilled and resilient workforce

**Secondary Drivers** Proactive and person-centred responses to stress and distress Dementia friendly hospital environments Meaningful activities linked to the needs of individuals Staff wellbeing Staff training Quality improvement approach

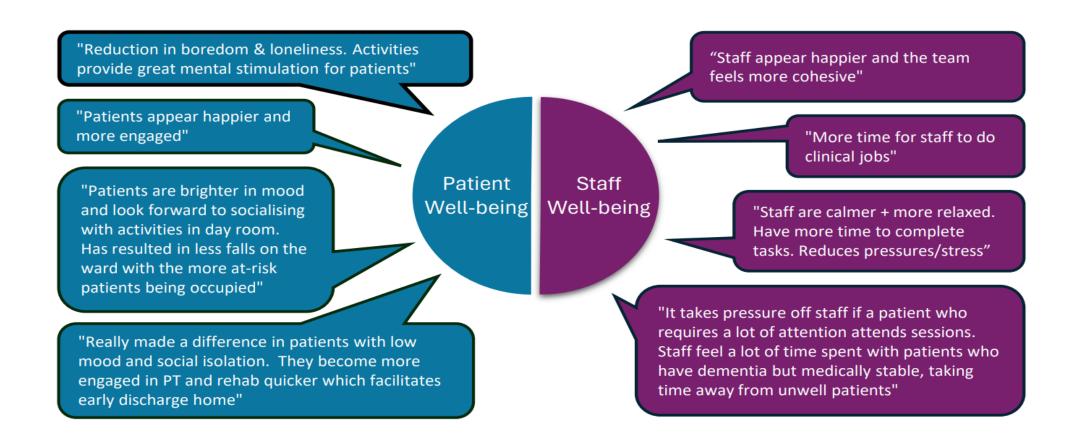

#### **Staff Perceptions**

- Patients are inactive for long periods in the day.
- Inactivity leads to stress, distress and worsening mental health of patients.
- Inactivity contributes to physical decline and lack of appetite.
- Patient inactivity and boredom impact of nursing staff's workload.
- Negative impact on engagement in therapeutic work.
- Patients can be very isolated and lack social interaction.
- Nursing staff lack time to spend with patients.
- Some staff described feelings of guilt about this.

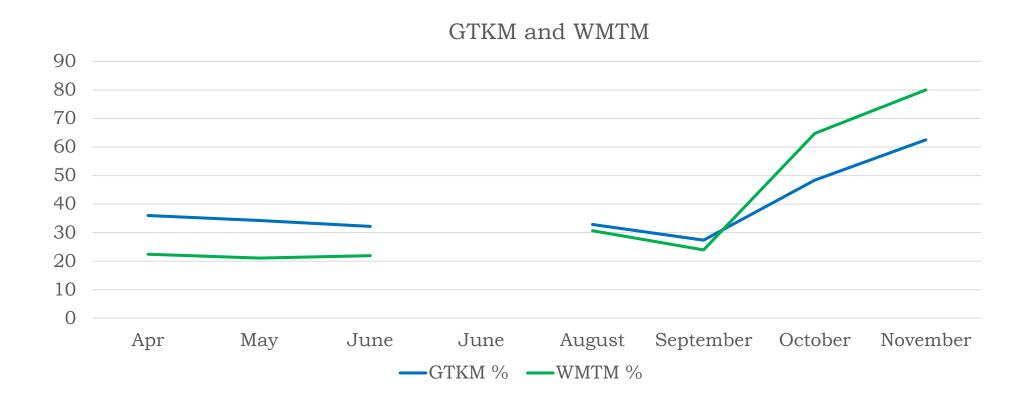

# What benefits have you noticed to patient/staff well-being since the introduction of the AC's?

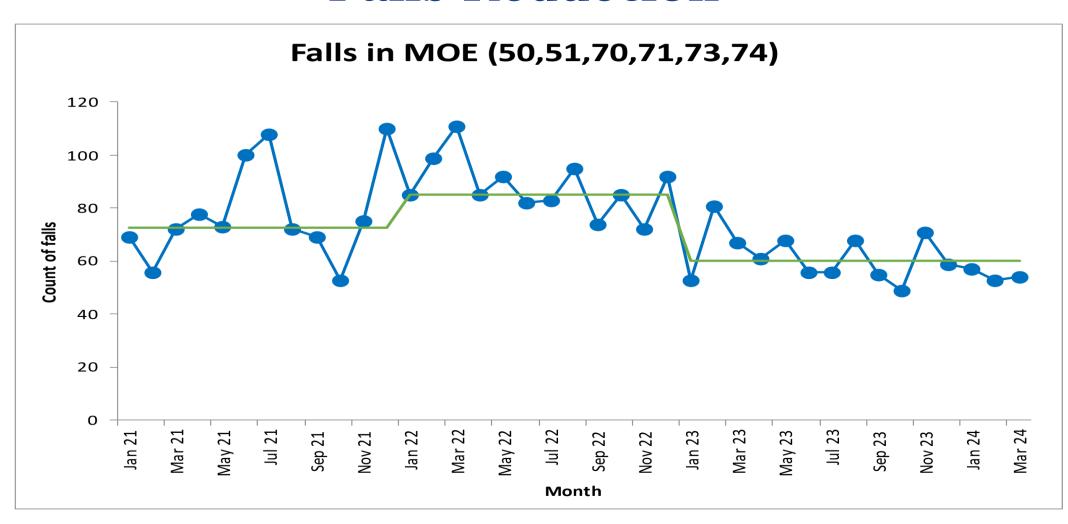

#### **Person Centred Care**

Getting To Know Me Forms and What Matters To Me Boards

#### **Falls Reduction**

#### Other Benefits of activities coordinators

- Nutritional benefits through patients eating together more (and easier for staff to monitor meals).
- Collaboration with PT teams to deliver group exercises
- Releasing time for roving MAT team to focus on other areas of the hospital, supporting staff in promoting a dementia friendly hospital.
- Roving team able to support education of nursing teams in dementia care and management of stress and distress reducing the need for continuous interventions.

#### Meaningful Activities Team - What Next?

- Work with other specialties within the hospital to promote benefits of Meaningful Activities
- Continue to promote non-pharmacological interventions for reducing and relieving delirium
- Development of a distressed care team
- Working with the surgical preadmission team and Recovery to support patients with dementia who have surgery
- Continue to work with the Volunteer team to increase activities support in non MOE wards and increase 3<sup>rd</sup> party input.
