

# Nursing and Midwifery

## Practice Learning in Clinical Research

Ruth Moss

Clinical Research Nurse Manager

Amy McLaren

Deputy Clinical Research Nurse Manager

# Our Vision for Practice Learning

For every student to have an **UNDERSTANDING** of what we do as clinical nurses and midwives.

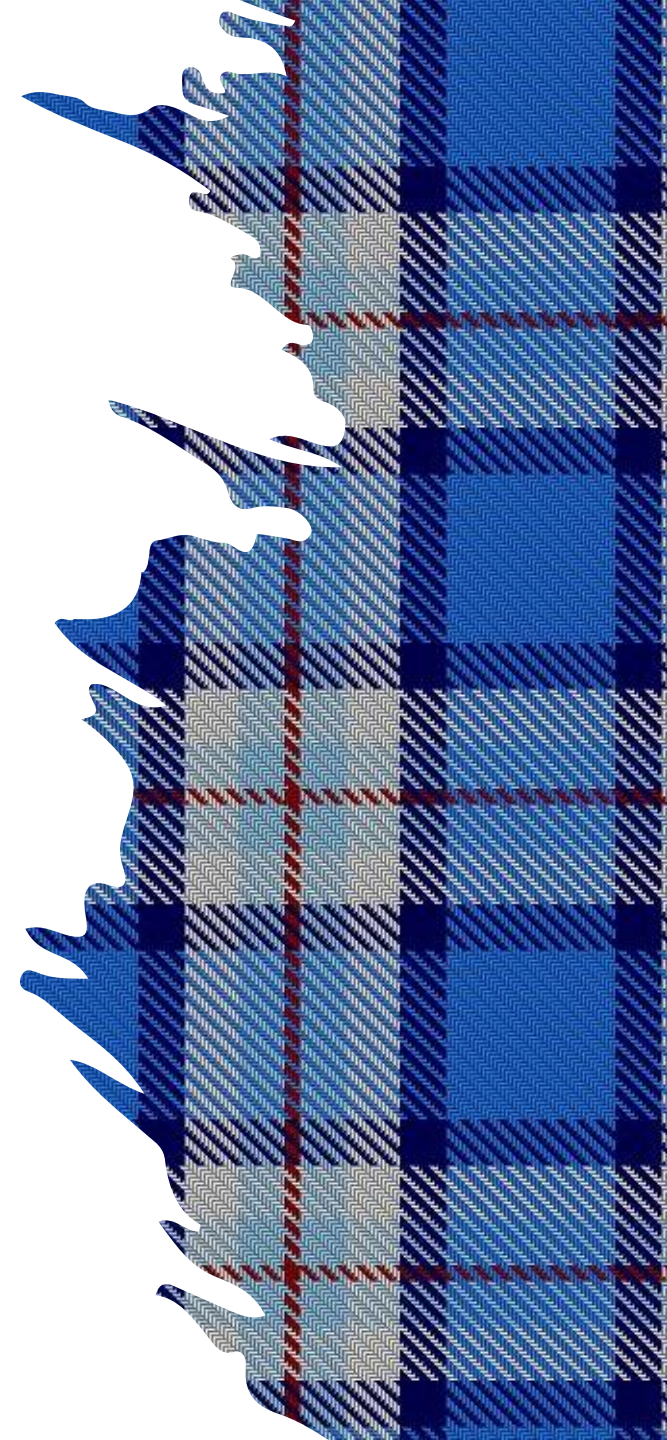

For every student to have the opportunity to **EXPERIENCE** clinical research nursing and midwifery during their training

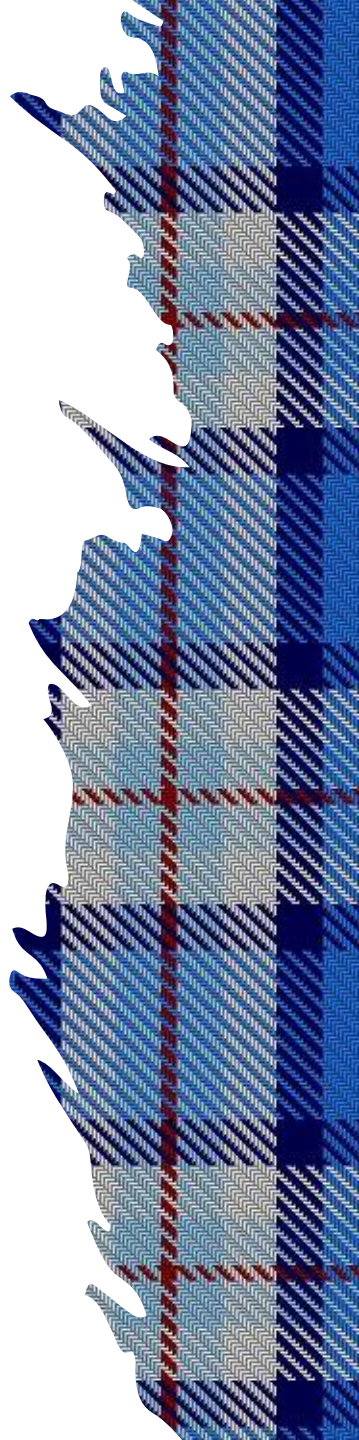

# How we align with the Nursing and Midwifery Strategy?

- ▶ **Workforce Planning: recruitment, retention and development**
- ▶ **Deliver excellence in safe high quality care**

# Key actions

- Established a Leadership Sub-Group
- Increase learning opportunities
- More practice supervisors and assessors
- Develop resources for every type of placement
- Events with Universities showcasing clinical research

# Student Feedback From QMU Event

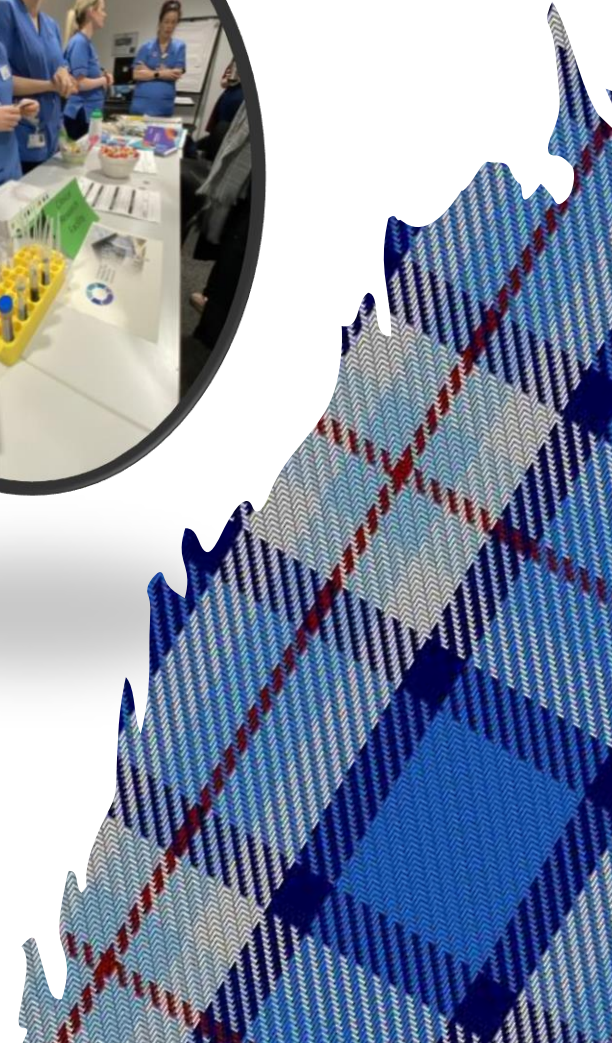

Even if we don't work in research there are many opportunities to contribute to it

Really interesting and definitely opens another avenue for me

made me rethink about being a research nurse in the future

Learning that it doesn't just involve writing up of findings

It's nothing like I thought it was - lots of patient contact and clinical skills used

# Next steps

Expanding placement offerings

Introduction to research nursing and midwifery workshops for students

Video for universities

Establish database of learning resources

Creating the content for a resources database on the Intranet
